

How the Senses have shaped our languages Scenarios

Scenario	Answer	Your Level of Understanding (Sensory Association)
What property is: $A + B = B + A$		
I am an odd number. Take away one letter and I become even. What number am I?		
How many gallons of water does it take to fill up an 800-gallon tank?		
The names of your mother's children are Tommy, Timmy, and Tammy. What is the name of the fourth child?		
How long will it take a car going 80m/h to reach a town 80 miles away?		
What are the factors of 24? Which of these factors are prime numbers?		
In the morning I walk on four legs, in the afternoon I walk on two legs, and in the evening, I walk on three legs. What am I?		
In a family of 10 individuals, how many relatives does the seventh kid have?		
If: $A + 5 = C$ $A + B = 15$ What is A if the above is true for all real numbers?		
Two fathers and two sons sat down to eat eggs for breakfast. They ate exactly three eggs; each person had an egg. How is this possible?		
$5 + 5 + 5 + 5 = 555$; where can you draw one straight line to make this true?		
3 men go into a hotel. The man behind the desk says a room is \$30 so each man pays \$10 and goes to the room. A while later the man behind the desk realized the room was only \$25 so he sent the bellboy to the 3 guys' room with \$5. On the way the bellboy couldn't figure out how to split \$5 evenly between 3 men, so he gave each man a \$1 and kept the other \$2 for himself. This meant that the 3 men each paid \$9 for the room, which is a total of \$27 add the \$2 that the bellboy kept = \$29. Where is the other dollar?
